

## Guidance on use of chemicals at the station

- Include a list of packed chemicals.
- A material safety data sheet must be included for each chemical.
- Chemicals should be stored safely and securely packed in the dedicated chemicals cabinet.
- All chemicals (including gas cylinders) must be removed from the station on departure.
- All chemical waste must be removed from the station on departure.
- Bring yourself slump bottles and bins for disposal of needles and sharp objects.
- Remember transport documents to and from the station.

Transport documents can be obtained from Aarhus University's safety advisor:

<https://medarbejdere.au.dk/en/administration/hr/workingenvironment/physical-work-environment/chemistry-and-biology/safety-adviser-function>

Email: [tgs@au.dk](mailto:tgs@au.dk)

The transport documents must follow the chemicals and are valid from the point of departure for the station to the point of return
