

Guidance on the use of chemicals at Rønbjerg field station

- Include a list of packed chemicals.
- A material safety data sheet must be included for each chemical.
- Chemicals should be stored safely and securely packed in the dedicated chemicals cabinet.
- All chemicals must be removed from the field station on departure.
- All chemical waste must be removed from the field station on departure.
- Bring along slump bottles and bins for disposal of needles and sharp objects.
- Remember transport documents to and from Rønbjerg field station.

Transport documents can be obtained with Aarhus University's safety advisor:

<https://medarbejdere.au.dk/administration/hr/arbejdsmiljoe/fysiskarbejdsmiljoe/kemi-og-biologi/sikkerhedsraadgiverfunktionen/>

Email: Sikkerhedsraadgiver@au.dk

The transport document is valid on the way to the field station, when staying at the station and when returning from the station again and must follow the chemicals.
