

## Marine mammal conservation workshop at the Aarhus Institute for Advanced Studies, May 8th 2019:

- 0900 Peter "Welcome and a few simple thoughts on marine mammals and noise"
- 0920 Rob Williams "Killer whale conservation"
- 1010 Coffee
- 1030 Chloe Malinka "An autonomous vertical hydrophone array to study the acoustic ecology of toothed whales."
- 1050 Jamie McCauley "Tracking harbour porpoises around gill nets using passive acoustic monitoring."
- 1120 Kristian Beedholm "Why a directional echolocation beam is a bad thing if you want to avoid gill nets"
- 1135 Michael Bjerre "The costs of whistling in a noisy world"
- 1200 Lunch**
- 1230 Fredrik Christiansen "Baleen whale body condition and PCOD"
- 1315 Sara Otiz "Are porpoises social?"
- 1345 Laia Rojano-Doñate "Does a life in the fast lane make porpoises vulnerable to disturbance"
- 1415 Kate Sprogis "Noise is the driver of behavioral responses of humpback whales to whale watching vessels"
- 1445 Jakob Tougaard "Masking of mating calls in harbour seals by ship noise in Kattegat"
- 1515 Coffee and discussion
